TECH PARA MÍ

@techparami | Misión Tech | Tech Para Mí | @techparami | Linktree

Tech Para Mí is a youth-led nonprofit organization that promotes **equitable access to technology** and **democratizes STEM education** for children and youth in communities with limited educational resources.

Through free **robotics, electronics, and programming workshops**, offered both virtually and and through in-person school visits, children and teenagers aged 9 to 17 develop technological skills in a hands-on, interactive way while strengthening their teamwork and creative thinking.

Activities include building robots from recycled materials, video game development classes introducing computation basics, and electronics lessons summer camps using interactive platforms like Tinkercad.

EFFORTS AND IMPACT

300+ students have benefited from our workshops

Reaching **8** Latin American countries.

5000 plastic bottles collected to build robotics kits

15+ volunteers and instructors equipped

92% increase in robotics knowledge among students

MISIÓN TECH - ROBOTICS CAMP

Website | Media Kit

Tech Para Mí, in collaboration with Astranova Perú, launched *Misión Tech*, Peru's **first robotics camp** for high school students. The free program offers an immersion in engineering with:

- Electronics, programming and 3D workshops
- Expert talks and leadership sessions
- Hands-on electronics challenges
- Collaborative Robotic Hackathon
- Innovation bootcamp tackling SDGs

Sponsored and supported by **Peru's Ministry of Women and Vulnerable Populations, Peu's Ministry of Education**, UTEC University & Applying Consulting AWS.

Coming soon...

Currently, we are planning and working to launch a GIRLS version of Misión Tech in Peru's southern provinces, which have limited access to technology programs, such as Arequipa and Cusco. Future news here: https://www.instagram.com/techparami
